

CONFIRMATION OF CARBON CREDIT RETIREMENT

for

Aberdeen Airport

On 17 September 2026, 1,497 tCO₂e were retired on behalf of Aberdeen Airport.

This document confirms the retirement of carbon credits from the Bursa-Hamitler Landfill Gas Collection and Energy Utilization Project (GS1068) and the AgreenaCarbon Project (VCS 4022) on the internationally recognised Gold Standard and Verra registries, respectively. These credits were issued under accredited international standards and independently verified by third parties for the relevant monitoring periods.

Through this retirement, Aberdeen Airport supports two complementary climate solutions: capturing landfill methane and using it to generate energy, and promoting regenerative agricultural practices that increase soil carbon storage and reduce greenhouse gas emissions. The associated serial numbers have been permanently retired and are publicly recorded in the Gold Standard and Verra registries.
